

Draft Common Response Review

Attached are draft Common Responses # 6, Groundwater Storage Instead of New Dams and Reservoirs; CR #11, Current Agricultural Practices; CR #12, No Adverse Effects on Agricultural Land, # 13, Area of Origin Water Rights Issues, and CR #16, Isolated Facility/Peripheral Canal.

The common responses address general comments made on the PEIS/EIR and appendices. In general, existing language from the PEIS/EIR, Revised Phase II Report, Program Plans and other PEIS/EIR appendices was used to develop the common response. Therefore, if you take issue with a draft common response, it probably will require subsequent review and adjustment of a Program Plan, the PEIS/EIR or other CALFED document.

The common responses are structured with an introduction summarizing the comments addressed in the common response. The reader is then directed to sources within the PEIS/EIR, Program Plans or other appendices for additional information. Information that addresses the general comment, or a recurring theme of the overall topic of the Common Response, is then presented to provide a response.

Please provide any comments by Friday, November 5, or direct questions to Nancy Ullrey at (916) 653-2354.
